Product Analyst

Are you interested in leading projects bridging research and production? The Earth Observation Research team here at Sinergise is looking for an analyst to help us scale our solutions and products to many countries and clients!

Sinergise is a leader in Earth observation, working closely with the European Space Agency on processing satellite data and extracting valuable information from tens of petabytes of imagery. From data collected by satellites orbiting the Earth, our algorithms can tell when farmers have ploughed or mowed their fields or meadows, the land cover of a particular area of interest, or what type of crop is being grown. We do this regularly for millions of fields.

Your daily tasks will include:

- communication with clients and the team
  - understanding the client's requirements
  - identifying how our solutions can meet said requirements
  - identifying potential issues or limitations in our solutions/product
  - ensuring clear communication between the clients and the team
- quality assurance
  - reviewing results to ensure they are of sufficient quality
- working with reference (vector) data
  - checking if the data provided by the client is in line with expectations and meets the relevant quality standards
  - data manipulation
- project management
  - planning, monitoring the progress and ensuring that deadlines are met
- writing reports
  - summarising results, identifying potential issues
- organise labelling campaigns
  - label and communicate labelling guidelines to all stakeholders.

Key qualifications:
- excellent communication skills
- proactiveness and self-initiative
- willingness to learn
- fluency in English (written and spoken)

Nice-to-haves:
- experience with GIS tools (QGIS, ArcGIS or similar)
- knowledge of Python is a plus.

We offer:
- working in a great team and solving problems together with experts in earth observation, data science, machine learning and software development
- continuous learning and development opportunities
- interesting and meaningful projects (read more about the cool stuff we do in our blog posts)
- a transparent salary policy
- possibility of fully remote / hybrid work
- flexible hours
- pancake Mondays!

Send you application and CV to: work@sinergise.com
