

CV-Martina Vivoda Prodan

My name is Martina Vivoda Prodan and I was born on February 5th, 1984 in Koper, Slovenia. I attended elementary school in Roč and after that comprehensive school in Pazin. In 2002 I signed Faculty of Civil engineering in Rijeka and in 2007 graduated with thesis "Landslide remediation beside Nautical school in Bakar" under leadership of prof.dr.sc. Željka Arbanas. In the same year I employed in Institute IGH as an associate designer on geotechnical projects. In 2009 I started PhD study at the Faculty of Civil Engineering in Rijeka. In 2010 I employed the same Faculty as a scientific novice on Japanese-Croatian bilateral project "Risk Identification and Land-Use Planning for Disaster Mitigation of Landslides and Floods in Croatia". I work as an assistant in the student educational system with tutorials in Geotechnical engineering, Soil and rock mechanics, Geotechnical constructions, Theoretical soil mechanics, Analysis and observation in geotechnics, and other classes. In 2009 I attended LARAM School in Salerno, Italy and in 2012 two months training program on the University of Kyoto, Japan. I am an active participant of the IPL-184 Project "Study of landslides in flysch deposits of North Istria, Croatia: sliding mechanisms, geotechnical properties, landslide modelling and landslide susceptibility", the Slovenian-Croatian bilateral Project SoLiFlyD "Study of landslide in flysch deposits" and University of Rijeka Project: "Razvoj sustava monitoringa klizišta i ranog upozoravanja za potrebe umanjenja hazarda od klizanja tla". During student days and until now I participated on domestic and international scientific courses and congresses and I wrote two scientific papers in journals and more than thirty scientific conference papers.
